

# STRAP/50/70

Mounting instructions

As Strap/50 and 70 are heavy mirrors, we advise that you secure them with an extra screw in the wall mount on the back of the mirror. After attaching the wall mounts, place the mirror on the screw and finally place the silicone strap around the mirror and then the wall mount.

Strap/50

Distance between the screw and the wall mount/

21,3 cm

Strap/70

Distance between the screw and the wall mount/

23,1cm

The screws and rawplugs enclosed are suitable for a brick wall. If you are mounting the mirror on a different material you should buy suitable screws and rawplugs.
